interactive reptile experience

Method Statement

We (snakes alive limited) can confirm that in providing animals for an event or party we will follow procedures outlined below:

Transportation

1. We aim to transport our animals to and from events with the upmost care by...
 - a) securing them in transportation enclosures - these may appear small however it reduces the risk of movement within the vehicle that may cause harm
 - b) checking the animals and suppling them regular breaks on long journeys
 - c) ensuring they have suitable ventilation, especially during hot weather
 - d) keeping them warm during cold weather through insulation (that does not restrict ventilation) and using additional heating

For the Event Organisers

2. We will be punctual and allow suitable time to set up prior to the event, an notify the organiser of any delays that may occur
3. Coordinate as necessary with the event organiser

Displaying our Animals

4. We will check that the display area is suitable for our animals, such as making sure there are no cold drafts during the winter months
5. Ensure there will be sufficient space for guests and consider control measures if the space becomes over crowded
6. We will unload and set up enclosures and regulation equipment where necessary and then move animals into these
7. We will check that enclosures are secure, electrical equipment is not causing a hazard and display our health and safety signs (hand washing signs etc)
8. Keepers will handle and display the animals as suitable for the event and the age range of the guests.
9. Keepers will remove animals that show any signs of distress, tiredness or aggression immediately
10. Keepers will clear away excess waste or debris from the display area at the end of the event.
